

Dear Educator,

Embark on a magical rainforest journey with *Forest Family Forever!* This dynamic 14 minute video for grades 1-5 is guaranteed to educate your students and to empower them with ways they can help save the rainforests. Use it in conjunction with any rainforest unit to enhance your classroom's experience.

The *Forest Family Forever!* video comes with a *Forest Hero Action Packet* that contains:

- Fact sheets
- Activity sheets
- An *Action Alert*
- A tree-free classroom poster

You will also find an enclosed evaluation form. If you would like to continue to receive free teaching materials from Rainforest Action Network, please fill out the evaluation and return it in the enclosed envelope. Your feedback is tremendously important to us and helps us create materials that best suit your classroom's needs.

If you're not already part of our Rainforest Teacher Listserve, and you would like to receive periodic rainforest updates and "save the rainforest" activities via e-mail, you can join by going to www.ran.org and clicking on *Kid's Action Team*. So far, over a thousand teachers are part of this listserv and have found it an efficient way to stay in touch.

We hope you enjoy these materials, and that you will share them with other teachers at your school. If you have any questions, please call me at (415) 398-4404. Thank you for your concern about the world's last remaining rainforests and for teaching your students about these endangered ecosystems. Together, we really *are* making a positive difference!

For the forests,

Tamar Hurwitz

Education Outreach Director

PS: All of the *Forest Hero Action Packet* fact sheets and activity sheets are printed on a blend of 45% agri-pulp (straw waste), 45% recycled pulp, and 10% mineral filler. If you make photocopies for your students, please be sure to use the most forest-friendly paper available to you!
